1958 ANNUAL INDEX

Textile Research Journal

Volume XXVIII

MONTH	PAGES	MONTH	PAGES
January	1–94	July	533–630
February	95–184	August	631–720
March	185–274	September	721–818
April	275–360	October	819–896
May	361–446	November	897–970
June	447–532	December	971–1060

L = Letter

AUTHOR AND TITLE INDEX

ALLEN, Eugene (Woerner, Fordemwalt). A Laboratory Study of Package Dyeing . . . 1031

AMES, W. F. (Eckstein, Olson). Response to Environmental Changes and an Equation of State for Nylon Yarn . . . 701

ARTHUR, Jett C., Jr. The Effects of Gamma Radiation on Cotton. *Part II:* Proposed Mechanism of the Effect of High Energy Gamma Radiation on Some of the Molecular Properties of Purified Cotton . . . 204

(Blouin). The Effects of Gamma Radiation on Cotton. *Part I:* Some of the Properties of Purified Cotton Irradiated in Oxygen and Nitrogen Atmospheres . . . 198

ASHCROFT, J. M. The Reliability of the Soil Burial Method for Evaluating Textile Preservative Treatments . . . 422

BAILEY, August (Honold, Skau). Iodine Sorption Values of Some Chemically Modified Cottons—L . . . 895

(Honold, Skau). Topochemical Mechanisms Involved in the Preparation and Deacetylation of Partially Acetylated Cottons . . . 861

BAKER, Cameron (Kirk, Gaffney). An Optical Measurement of the Trash Content of Ginned Cotton . . . 510

BAKKER, E. J. (Checkland, Bull). A Two-Dimensional Load-Extension Tester for Fabrics and Film . . . 399

BALLOU, J. W. (Roetling). High Speed Tensile Testing of Fibers . . . 631

BARACH, J. L. (Stoll, Tesi). Predicting Commercial Acceptance of a Fiber . . . 747

BARTULOVICH, John J. (Simmonds). The Amino Acid Composition of Fractionated Cortical Cells From Wool . . . 378

BASKIN, A. David (Kaplan). Phototenderization by Anthraquinone 2,6-Disulfonic Acid of Cotton Duck Before and After Weathering . . . 554

BERNI, R. (Klein, Stanonis, Harbrink). The Preparation and Properties of Partially Benzylated Cotton . . . 659

BIKALES, Norbert M. (Rapoport). Cyanoethylation of Cotton in Aqueous Medium . . . 737

BLOUIN, Florine A. (Arthur). The Effects of Gamma Radiation on Cotton. *Part I:* Some of the Properties of Purified Cotton Irradiated in Oxygen and Nitrogen Atmospheres . . . 198

BOGATY, Herman (Lourigan, Harris). Structural Compactness of Woven Wool Fabrics and Their Behavior in Modern Washing Machines . . . 733

BOUDREAU, William A. (Honold, Skau). A Method for Measuring Yarn Softness and Its Use to Show the Effect of Single and Ply Twist on the Softness of 31/2 Cotton Yarns . . . 206

BOULTON, John. The Dyeing of Cellulose: Theory and the Dyer . . . 1022

BRAGG, Lawrence O. The Effect of Bottom Front Roll Run-Out in Spinning on Yarn Quality and Processing Performance . . . 530

BRANDT, Carl D. A Study of Cotton Combing . . . 616

BRASSEUR, Harry. Spinning Tests for Predicting Yarn and Fabric Quality . . . 626

BROWN, Hugh M. A Pneumatic Method of Measuring Cotton Fiber Staple Length . . . 516

BROWN, R. S. (Rusca, Miller). An Investigation of Air Pressures in The Cotton Carding Machine . . . 593

(Rusca, Miller). Carding Without Flats—A Report on The SRRL Card . . . 597

BRYANT, F. An Application of the Davidson Color Matching Method . . . 811

Some Historical Evidence Relative to the Assessment of Wool Fiber Diameter—L . . . 88

Some Practical Aspects of the Fibrous Acetylation of Cotton Yarn . . . 180

BUCK, George S. Jr. Some Concepts of Cotton Research . . . 778

BULL, T. H. (Bakker, Checkland). A Two-Dimensional Load-Extension Tester for Fabrics and Film . . . 399

BURKHALTER, J. A Rapid Approximation for Standard Deviation and Coefficient of Variation—L . . . 91

BUSH, G. F. Modified Vibrascope Technique—L . . . 89

BUTLER, M. L. (Marsh, Merola, Simpson). The Influence of Weathering Prior to Harvest on Certain Properties of Cotton Fibers . . . 95

BYATT, W. J. (Elting). Changes in the Weight Distribution of Fiber Lengths of Cotton as a Result of Random Fiber Breakage . . . 417

CAMPBELL, Patricia W. (Rutherford, Teszler, Kiser). The Effect of Nuclear Radiation on Fibrous Materials. *Part III:* Relative Order of Stability of Cellulose Fibers . . . 456

CATES, D. M. (Cranor). Nonsilicate Stabilization of Hydrogen Peroxide Bleach Solutions . . . 708

CAUBLE, D. Hunter. The Effect of Comber Lap Preparation on Yarn Quality . . . 502

CHAKRAVARTY, A. C. Change of Cross-Sectional Area of Single Jute Filaments with Relative Humidity . . . 878

CHARLES, Frank R. (Tarzi). On the Physical Properties of Rayon and Nylon 66 Tire Cords at Elevated Temperature . . . 797

CHECKLAND, P. B. (Bull, Bakker). A Two-Dimensional Load-Extension Tester for Fabrics and Film . . . 399

CLAYTON, R. L., Jr. (Segal, Philips, Loeb). Oil and Water Repellent Treatments for Cotton with Fluorochemicals . . . 233

COE, A. B. (Menkart). Microscopic Studies on the Structure and Composition of Keratin Fibers . . . 218

COLEMAN, Bernard D. (Knox, McDevit). The Effect of Temperature on the Rate of Creep Failure for 66 Nylon . . . 393

Correction . . . 891

COLEMAN, R. A. (Peacock). Ultraviolet Absorbers . . . 784

Correction . . . 968

COLTON, Lawrence E. (Hurwitz). Dialdehydes as Cotton Cellulose Cross-Linkers . . . 257

CONRAD, Carl M. (Tripp, Orr, Zelle). Some Relationships Between Supermolecular Structure and Mechanical Behavior of Native and Chemically Modified Cotton Cellulose . . . 404

COOVER, H. W. (Lyon, Wooten). Identification and Determination of Verel Fiber in Fabrics—L . . . 530

COPLAN, Myron J. A Study of Blended Woolen Structures. *Part IV:* Some Analytical Methods for Blend Determination . . . 956

CRAM, K. W. (Whitwell). Comparison of Methods for Determining Intrinsic Viscosities from Non-Newtonian Viscosities . . . 849

CRANE, R. A. (Wharff). An Automatic Single Fiber Tensile Strength Tester . . . 343

CRANOR, W. H. (Cates). Nonsilicate Stabilization of Hydrogen Peroxide Bleach Solutions . . . 708

CREWTHER, W. G. (Pressley). Carbonizing Investigations. *Part IV:* Industrial Carbonizing Trials to Assess the Protection of Wool by Surface Active Agents Added to the Wool . . . 67

(Pressley). Carbonizing Investigations. *Part V:* The Effect of Water Content on the Action of Sulfuric Acid on Wool: The Significance of Tests for Damage . . . 73

CUNNINGHAM, R. G. (Montgomery). Studies in the Static Electrification of Filaments . . . 971

CYROT, J. The Effect of Mercerization on Cotton's Resistance to Microorganisms . . . 1048

DAVIS, Norman C. Factors Influencing the Air Permeability of Felt and Felt-Like Structures . . . 318

Correction . . . 504

deVRIES, H. (Weijland). A Submerged Cantilever Densitometer for Fibers—L . . . 183

DILLON, J. H. (Levy, Kauzmann, Wakelin). Relation of Charge to Frictional Work in the Static Electrification of Filaments . . . 897

DOBOZY, O. K. Cause of Wool Felting—L . . . 717
DOGLIOTTI, L. M. (Wrigley, Susich). Microscopical Study of a Multilayer Nylon Body Armor Panel After Impact . . . 361
DOWNES, J. G. (Leary). A Yarn Irregularity Tester Using the Vibrating String Principle . . . 497
(Mackay). An Automatic Vibroscope . . . 467
DUPRÉ, Elsie F. (McCall, O'Connor). Applications of Infrared Absorption Spectroscopy to Investigations of Cotton and Modified Cottons. *Part II:* Chemical Modifications . . . 542
(Mitcham, O'Connor). Applications of Infrared Absorption Spectroscopy to Investigations of Cotton and Modified Cottons. *Part I:* Physical and Crystalline Modifications and Oxidation . . . 382
DUSENBURY, J. H. (Wakelin). Effects of Crip and Cross-Sectional Area on the Mechanical Properties of Wool Fibers . 989
DYER, R. F. (Forrester, Faw, Semmler). Recent Developments in Lofted Acetate Yarns for Apparel and Home Furnishing Fabrics. *Part I:* Apparel Fabrics . . . 761
(Forrester, Faw, Semmler). Recent Developments in Lofted Acetate Yarns for Apparel and Home Furnishing Fabrics. *Part II:* Lofted Carpet Yarns . . . 765

ECKSTEIN, B. H. (Olson, Ames). Response to Environmental Changes and an Equation of State for Nylon Yarn . . . 701
ELTING, J. P. (Byatt). Changes in the Weight Distribution of Fiber Lengths of Cotton as a Result of Random Fiber Breakage 417
(Pryor). Nepotometer Studies: Use as a Mill Instrument—A Progress Report . . . 575
ENRICK, N. L. (Hicks). Variations in Roving Weight Introduced by the Slubber—A Summary of Findings from the Analysis of Mill Produced Rovings . . . 564

FAW, W. G. (Semmler, Dyer, Forrester). Recent Developments in Lofted Acetate Yarns for Apparel and Home Furnishing Fabrics. *Part I:* Apparel Fabrics . . . 761
(Semmler, Dyer, Forrester). Recent Developments in Lofted Acetate Yarns for Apparel and Home Furnishing Fabrics. *Part II:* Lofted Carpet Yarns . . . 765
FEIGL, Fritz (Gentil, Jungreis). The Application of Spot Tests in the Examination of Synthetic Fibers . . . 892
FEUGHLEMAN, M. (Haly, Mitchell). The Nature of Permanent Set in Keratin Fibers . . . 655
(Mitchell). The Variability of Set in Keratin Fibers . . . 453
FISHER, C. H. (Perkerson). Chemical Modification of Cotton: Progress and Current Status . . . 769
FORDEMWALT, Fred (Woerner, Allen). A Laboratory Study of Package Dyeing . . . 1031
FORRESTER, R. C. (Faw, Semmler, Dyer). Recent Developments in Lofted Acetate Yarns for Apparel and Home Furnishing Fabrics. *Part I:* Apparel Fabrics . . . 761
(Faw, Semmler, Dyer). Recent Developments in Lofted Acetate Yarns for Apparel and Home Furnishing Fabrics. *Part II:* Lofted Carpet Yarns . . . 765
FORTESS, Fred (Salvin). Factors Influencing the Dyeing of Acetate Fibers with Disperse Nonionic Dyes . . . 1009
FRANK, Floyd I. (Ruoff). A Method of Measuring Poisson's Ratio of Fibers . . . 213
FRASER, R. D. B. (Pressley). Felting Investigations. *Part I:* Potential Substitutes for Rabbit Fur in Hat Felts . . . 478

GAFFNEY, Harry (Baker, Kirk). An Optical Measurement of the Trash Content of Ginned Cotton . . . 510
GENTIL, Vincente (Feigl, Jungreis). The Application of Spot Tests in the Examination of Synthetic Fibers . . . 892
GHOSH, R. C. (Holker, Speakman). The Reactivity of Keratin 112
GLYNN, M. V. A Method for Determining the Sulfur Content of Wool . . . 744
GOLDTHWAIT, Charles F. (Murphy). Comparative Mercerization of Yarns Made from Pima S-1, Peruvian Pima B-B, and Egyptian Karnak Cottons . . . 267
(Murphy). Novel Mercerizing Technique to Establish "True" Length of Cotton Yarn . . . 15
(Robinson). Improved Light and Weather Resistance of Cotton Resulting from Mercerization . . . 120
GOTTLIEB, I. M. (Wakeham, Virgin). Compressional and Absorptive Behavior of Bulk Fiber Systems . . . 41
GRAHAM, Robert T. (Loibl, Wiebush). The Application of Resin Finishes to Cotton Garments Using Drycleaning Plant Equipment . . . 252
GRANT, J. N. (McDonald, Humphreys). Physical Properties of Chemically Modified Cottons. *Part IV:* Effects of Partial Carboxymethylation . . . 60
GREGORY, Luis E. (Merola). Isolation and Identification of Fumaric Acid in Raw Cotton Fiber . . . 813
GRIFFITH, J. (Haly). Penetration and Supercontraction of Keratin Fibers by Lithium Bromide Solutions . . . 32
GRIGNET, J. (Monfort). Dynamometric Measurements on Wool Fibers in Tops: Mean Value of Specific Strength, Work of Stretching, and Rate of Loading—L . . . 719
(Monfort). Some Dynamometric Applications of an Electronic Integrator-Differentiator . . . 47
GULLBRANDSON, Bengt. Fiber Damage in the Stock Dyeing of Wool . . . 965

HALY, A. R. Ultraviolet Irradiation and the Wool Fiber Epicuticle—L . . . 182
(Feughleman, Mitchell). The Nature of Permanent Set in Keratin Fibers . . . 655
(Griffith). Penetration and Supercontraction of Keratin Fibers by Lithium Bromide Solutions . . . 32
HAMBURGER, W. J. (Platt, Klein). Mechanics of Elastic Performance of Textile Materials. *Part XIII:* Torque Development in Yarn Systems: Singles Yarn . . . 1
HARBRINK, P. (Klein, Stanonis, Berni). The Preparation and Properties of Partially Benzylated Cotton . . . 659
HARRIS, Hazel E. (Bogaty, Lourigan). Structural Compactness of Woven Wool Fabrics and Their Behavior in Modern Washing Machines . . . 733
HARRIS, Jay C. Electrical Forces Affecting Soil and Substrate in the Detergency Process—Zeta Potential . . . 912
HARRISON, D. (Speakman). The Pore Size of Keratin . . . 1005
HEBERLEIN, Georg (Weiss). Versatile Cotton in High Style Finishing . . . 227
HERTEL, K. L. Micronaire Reading as a Close Approximation to Fiber Thickness—L . . . 442
HEYN, A. N. J. The Occurrence of Myrothecium on Field Cotton—L . . . 444
HICKS, W. D. (Enrick). Variations in Roving Weight Introduced by the Slubber—A Summary of Findings from the Analysis of Mill Produced Rovings . . . 564
HILTON, Clifford L. The Identification and Estimation of Phenolic Fungicides in Mildewproof Materials . . . 263
HOCHSTAEDTER, L. Rhovyl—Polyvinyl Chloride Fibers . . . 78
HOLKER, J. R. (Ghosh, Speakman). The Reactivity of Keratin 112
HONOLD, Edith (Bailey, Skau). Iodine Sorption Values of Some Chemically Modified Cottons—L . . . 895
(Bailey, Skau). Topochemical Mechanisms Involved in the Preparation and Deacetylation of Partially Acetylated Cottons 861
(Boudreau, Skau). A Method for Measuring Yarn Softness and Its Use to Show the Effect of Single and Ply Twist on the Softness of 31/2 Cotton Yarns . . . 206
HOWSMON, John A. Non-Apparel Applications of Viscose Rayon . 805
HUMAN, J. P. E. The Polarographic Estimation of Sulfhydryl and Disulfide Groups in Wool . . . 647
HUMPHREYS, G. C. (Grant, McDonald). Physical Properties of Chemically Modified Cottons. *Part IV:* Effects of Partial Carboxymethylation . . . 60
HURWITZ, Melvin D. (Colton). Dialdehydes as Cotton Cellulose Cross-Linkers . . . 257

IRELAND, D. W. (Wilkinson). The Creasometer—An Apparatus for Measuring Crease and Pleat Sharpness and Retention . . 674
IRVINE, J. B. (Kress). Acetal Cellulose Reactants . . . 148
IYENGAR, R. L. N. (Sundaram). Cotton Fiber Maturity Rapidly Predicted with Variable Volume of Sample in Micronaire—L . 1045

JOHNSON, Burt. Manufacturing Performance and the Evaluation of Fiber Quality . . . 620
JOSEPH, Beatrice (Menkart). The Significance of Wool Fiber Crimp. *Part II:* A Study on the Woolen System . . . 940
JUNGREIS, Erwin (Feigl, Gentil). The Application of Spot Tests in the Examination of Synthetic Fibers . . . 892

KALISKI, E. J. A Plowing Theory of Yarn Surface Friction . . . 325
KAPLAN, Arthur M. (Baskin). Phototenderization by Anthraquinone 2,6-Disulfonic Acid of Cotton Duck Before and After Weathering . . . 554
KAUZMANN, W. J. (Levy, Wakelin, Dillon). Relation of Charge to Frictional Work in the Static Electrification of Filaments . 897

SUBJECT INDEX

ABSORBENCY OF TERRY TOWELS—effect of home laundering (*Murphy, Macormac*) . . . 337
ACETAL CELLULOSE REACTANTS (*Irvine, Kress*) . . . 148
ACETATE FIBERS
dyeing with disperse nonionic dyes, factors influencing (*Fortess, Salvin*) . . . 1009
ACETATE YARNS, LOFTED
in carpets (*Semmler, Forrester, Faw*) . . . 765
recent advances in the use of for apparel and home furnishing fabrics (*Semmler, Forrester, Faw*) . . . 761
ACETYLATION
fibrous, of cotton yarn, some practical aspects (*Bryant*) . . . 180
topochemical mechanisms involved in the preparation and deacetylation of (*Bailey, Honold, Skau*) . . . 861
ACTIVATION analysis of fibrous materials (*Testzer, Rutherford*) . . 86
AIR PERMEABILITY
of felt and feltlike structures, factors influencing (*Davis*) . . . 318
Correction . . . 504
AMIDE CROSS-LINKS
attempts to introduce into wool (*Maclaren*) . . . 946
AMINO ACID COMPOSITION of fractionated cortical cells from wool (*Simmonds, Bartulovich*) . . . 378
ANALYTICAL PROCEDURES
for blend determination—wool (*Coplan*) . . . 956
fumaric acid in raw cotton fibers, the identification and isolation of (*Gregory, Merola*)—**L** . . . 813
polarographic estimation of sulfhydryl and disulfide groups in wool (*Human*) . . . 647
spot tests in the examination of synthetic fibers (*Feigl, Gentil, Jungreis*) . . . 892
sulfur content of wool, a method for determining (*Glynn*) . . . 744
ANTHRAQUINONE, 2,6-DISULFONIC ACID
phototenderization of cotton duck with before and after weathering (*Baskin, Kaplan*) . . . 554
ANTISTATIC FINISHES, evaluating (*Steiger*) . . . 721
APPARATUS (*See also* **Vibroscope,** *etc.*)
electronic integrator-differentiator, dynamometric applications of (*Grignet, Monfort*) . . . 47

BACTERIOLOGICAL STUDIES
myrothecium on field cotton (*Heyn*)—**L** . . . 444
BLEACHING
of wool, evaluation of formaldehyde pretreatment for (*Moore, O'Connell*) . . . 687
BLEACH SOLUTIONS
hydrogen peroxide, nonsilicate stabilization of (*Cates, Cranor*) . 708
BLEND DETERMINATION IN WOOL, some analytical methods for (*Coplan*) . . . 956
BOTTOM FRONT ROLL RUN-OUT in spinning, its effect on yarn quality and processing performance (*Bragg*) . . . 530
BULK FIBER SYSTEMS, compressional and absorptive behavior of (*Gotlieb, Wakeham, Virgin*) . . . 41

CARBONIZING INVESTIGATIONS
effect of water content on the action of sulfuric acid on wool; the significance of tests for damage (*Crewther, Pressley*) . . . 73
surface active agents added to wool; industrial carbonizing trials to assess the protection of wool (*Crewther, Pressley*) . . . 67
CARBOXYMETHYLATION, PARTIAL
effects of on physical properties of cotton (*Grant, McDonald, Humphreys*) . . . 60
CARDING
machine, investigation of air pressure in (*Miller, Brown, Rusca*) . 593
without flats—a report on the SRRL card (*Rusca, Miller, Brown*) 597
CELLULOSE
dialdehydes as cotton cellulose cross-linkers (*Hurwitz, Colton*) . . 257
fibers
relative order of stability to nuclear radiation (*Testzer, Kiser, Campbell, Rutherford*) . . . 456
molecular weight of two seed hair celluloses (*Timell*) . . . 270
reactivity of (*Urquhart*) . . . 159
triacetate
crystal structure of, factors influencing (*Sprague, Riley, Noether*) 275
CHARGE TRANSFER upon contact between metals and insulators (*Van Ostenburg, Montgomery*) . . . 22
COEFFICIENT OF VARIATION and standard deviation, a rapid approximation for (*Burkhalter*) . . . 91
COMBER LAP PREPARATION
effect of on cotton yarn quality (*Cauble*) . . . 502
COMBING, a study of (*Brandt*) . . . 616
COMBING EFFICIENCY
effect of half lap needling on (*Sperling*) . . . 600
COMPUTER, IP–4 chart (*Parker, Rice*) . . . 87
COTTON
bacteriological studies
myrothecium—its presence on field cotton (*Heyn*)—**L** . . . 444
carboxymethylated, partially, effects on physical properties of (*Grant, McDonald, Humphreys*) . . . 60
carding machine, investigation of air pressures in (*Miller, Brown, Rusca*) . . . 593
carding without flats—a report on the SRRL card (*Rusca, Miller, Brown*) . . . 597
chemically modified, infrared absorption studies of (*O'Connor, DuPré, McCall*) . . . 542
iodine sorption values of (*Bailey, Honold, Skau*) . . . 895
partially benzylated, the preparation and properties of (*Klein, Stanonis, Harbrink, Berni*) . . . 659
chemical modification of: progress and current status of (*Fisher, Perkerson*) . . . 769
combing, a study of (*Brandt*) . . . 616
combing efficiency, the effect of half lap needling on (*Sperling*) . 600
cyanoethylation of in aqueous medium (*Bikales, Rapoport*) . . . 737
dialdehydes as cotton cellulose cross-linkers (*Hurwitz, Colton*) . . 257
field, occurrence of myrothecium on (*Heyn*)—**L** . . . 444
hydrogen peroxide bleach solutions, nonsilicate stabilization of (*Cates, Cranor*) . . . 708
improved light and weather resistance resulting from mercerization (*Goldthwaite, Robinson*) . . . 120
infrared absorption studies of chemically modified cottons (*O'Connor, DuPré, McCall*) . . . 542
in high style finishing (*Heberlein, Weiss*) . . . 227
irradiated, dyeing characteristics of (*Testzer, Wichari, Rutherford*) 131
properties of purified cotton gamma irradiated in oxygen and nitrogen atmospheres (*Blouin, Arthur*) . . . 198
proposed mechanism of the effect of high energy gamma radiation on some of the molecular properties of purified cotton (*Arthur*) . . . 204
manufacturing performance and the evaluation of fiber quality (*Johnson*) . . . 620
mercerization of (*See* **MERCERIZATION**)
modified (*See also* **chemically modified**)
infrared spectroscopy applied to investigations of physical and crystalline modifications and oxidation (*O'Connor, DuPré, Mitcham*) . . . 382
oil and water repellent finishes for using fluorochemicals (*Segal, Philips, Loeb, Clayton, Jr.*) . . . 233
partially acetylated
topochemical mechanisms involved in the preparation and deacetylation of (*Bailey, Honold, Skau*) . . . 861
raw
color change related to conditions of storage (*Nickerson, Tomaszewski*) . . . 485
resin finishes, the application of to garments using drycleaning plant equipment (*Graham, Loibl, Wiebush*) . . . 252
resin-treated, the effect of silicone softeners on (*Simpson*) . . . 170
spinning tests for predicting yarn and fabric quality (*Brasseur*) . 626
spinning tests, small lot, predicting ends down from (*Woo*) . . . 612
storage of
color change related to conditions of storage of raw cotton (*Nickerson, Tomaszewski*) . . . 485
sugar, pH, and strength changes during (*Nickerson, Tomaszewski*) —**L** . . . 528
tex-cotton count conversion scale (*Louis*)—**L** . . . 716
trash content of ginned cotton, an optical measurement of (*Baker, Kirk, Gaffney*) . . . 510
wrinkle resistant, durable creasing of (*Reid, Reinhardt, Kullman*) 242
COTTON CELLULOSE
chemically modified
supermolecular structure and mechanical behavior, relationships between (*Tripp, Orr, Ziifle, Conrad*) . . . 404
native
supermolecular structure and mechanical behavior, relationships between (*Tripp, Orr, Ziifle, Conrad*) . . . 404
COTTON FABRIC
quality, spinning tests for predicting (*Brasseur*) . . . 626
surface resistivity of at different temperatures and humidities (*Walker*)—**L** . . . 1047
COTTON FIBER
maturity rapidly predicted with variable volume of sample in Micronaire (*Iyengar, Sundaram*)—**L** . . . 1045
quality, the evaluation of (*Johnson*) . . . 620
strength and extensibility, transmission of (*Rebenfeld*) . . . 585
COTTON FIBER (RAW)
identification and isolation of fumaric acid in (*Gregory, Merola*) —**L** . . . 813
COTTON FIBERS
changes in weight distribution of fiber lengths due to random fiber breakage (*Byatt, Elling*) . . . 417
mechanical properties of and their response to mercerization (*Rebenfeld*) . . . 462
mercerization, their response to (*Rebenfeld*) . . . 462
staple length, a pneumatic method of measuring (*Brown*) . . . 516
surface of, distribution of dry soil on (*Tripp, Moore, Porter, Rollins*) . . . 447
weathering, influence of, prior to harvest on certain properties of (*Marsh, Merola, Buller, Simpson*) . . . 95
COTTON RESEARCH, some aspects of (*Tuck, Jr.*) . . . 778
COTTON YARN
novel mercerizing technique to establish "true" length of cotton yarn (*Goldthwait, Murphy*) . . . 15
practical aspects of fibrous acetylation of (*Bryant*) . . . 180
quality, effect of comber lap preparation on (*Cauble*) . . . 502
quality, spinning tests for predicting (*Brasseur*) . . . 626
softness, a method for measuring, and the effect of single and ply twist on the softness of 31/2 yarns (*Skau, Honold, Boudreau*) . . 206
CREASE RECOVERY and time, empirical relations of (*Wilkinson, Stanley*) . . . 669
CREASE SHARPNESS AND RETENTION
Creasemeter—an apparatus for measuring (*Wilkinson, Ireland*) . 674
CREASING
of wrinkle resistant cotton (*Reid, Reinhardt, Kullman*) . . . 242
CREASOMETER
apparatus for measuring crease and pleat sharpness and retention (*Wilkinson, Ireland*) . . . 674

CREEP FAILURE
of Nylon 66, effect of temperature on rate of (*Coleman, Knox, McDevit*) 393
Correction 891
CRYSTAL STRUCTURE of cellulose triacetate, factors influencing (*Sprague, Riley, Noether*) 275
CYANOETHYLATION
of cotton in aqueous medium (*Bikales, Rapoport*) 737

DAVIDSON COLOR MATCHING method, an application of (*Bryant*)—**L** 811
DENSIMETER
for fibers, a submerged cantilever (*deVries, Weijland*)—**L** 183
DETERGENCY PROCESS
electrical forces affecting soil and substrate in the detergency process—zeta potential (*Harris*) 912
DIALDEHYDES
as cotton cellulose cross-linkers (*Hurwitz, Colton*) 257
DIELDRIN
mothproofing of wool with (*Lipson, McPhee*) 679
DISCOLORATION of raw cotton related to conditions of storage (*Nickerson, Tomaszewski*) 485
DISULFIDE EXCHANGE
and urea-bisulfite solubility in wool, relation between (*Kessler, Zahn*)—**L** 357
bilateral structure and the swelling of mild pretreated wools (*Satlow, Kessler*)—**L** 359
DRYING BEHAVIOR
of fabrics (*Steele*) 136
effects of capillary size distribution on (*Steele*) 145
Correction 287
DURABLE CREASING
of wool, the fate of thioglycollic acid in fabric treated with glycollate (*Springell*) 874
DYEING
acetate fibers with disperse nonionic dyes, factors influencing (*Salvin, Fortess*) 1009
cellulose
and cellulose derivatives, introductory remarks to symposium on (*Valko*) 1008
theory and the dyer (*Boulton*) 1022
characteristics of irradiated cottons and rayons (*Tessler, Wichart, Rutherford*) 131
Davidson color matching method, an application of (*Bryant*)—**L** 811
package, a laboratory study of (*Allen, Woerner, Fordemwalt*) 1031
theory: retrospect and prospect (*Neale*) 1041
wool
fiber damage in the stock dyeing of (*Gullbrandson*) 965
DYES
disperse nonionic, factors influencing dyeing acetate fibers with (*Fortess, Salvin*) 1009
DYNAMOMETRIC APPLICATIONS of an electronic integrator-differentiator (*Grignet, Monfort*) 47

ELECTRICAL PROPERTIES
antistatic finishes, evaluating (*Steiger*) 721
relation of charge to frictional work in the static electrification of filaments (*Levy, Wakelin, Kauzmann, Dillon*) 897
static electrification of filaments, a study of (*Montgomery, Cunningham*) 971
surface resistivity of cotton, wool, and nylon fabrics at different temperatures and relative humidities (*Walker*)—**L** 1047
zeta potential
electrical forces affecting soil and substrate in the detergency process (*Harris*) 912
ENDS DOWN
predicting from small lot spinning tests (*Woo*) 612

FABRICS
capillary size distribution, its effects on drying behavior (*Steele*) 145
Correction 287
drying behavior (*Steele*) 136
drying behavior, effects of capillary size distribution of (*Steele*) 145
Correction 287
load-extension tester, two-dimensional, for (*Checkland, Bull, Bakker*) 399
tearing strength of, comparison of three methods for the determination of (*Turl*) 839
Verel fiber, identification and determination of in (*Coover, Lyon, Wooten*)—**L** 530
FADING
of dyed fabrics
ultraviolet absorbers (*Coleman, Peacock*) 784
FATIGUE FAILURE
in textile materials, the theory of (*Lyons*) 127
FELT
and feltlike structures
air permeability, factors influencing (*Davis*) 318
Correction 504
potential substitutes for rabbit fur in hat felts (*Fraser, Pressley*) 478
FIBER
breakage, changes in weight distribution of fiber lengths of cotton due to random (*Byatt, Elting*) 417
damage in the stock dyeing of wool (*Gullbrandson*) 965
diameter, some historical evidence relative to the assessment of wool (*Bryant*) 88
processing
symbols, the use of to describe (*Schwarz*) 560
thickness, Micronaire reading as a close approximation of (*Heriel*) 442

FIBERS
See also **Cellulose, Cotton, Nylon, Wool,** etc.
animal
chemical composition of as compared with Merino wools of differing crimp (*Simmonds*) 314
potential substitutes for rabbit fur in hat felts (*Fraser, Pressley*) 478
keratin
variability of set in (*Mitchell, Feughelman*) 453
Poisson's ratio of, a method of measuring (*Frank, Ruoff*) 213
predicting commercial acceptance of (*Barach, Stoll, Tesi*) 747
reaction spinning of (*Pohl*) 473
a submerged cantilever densimeter for (*deVries, Weijland*)—**L** 183
tensile strength tester for single fibers (*Crane, Wharff*) 343
tensile testing (high speed) of (*Ballou, Roetling*) 631
FIBERS, MAN-MADE
application of spot tests in the examination of (*Feigl, Gentil, Jungreis*) 892
spinning properties of (*Röder*) 819
FIBERS, SYNTHETIC (*See also* **Fibers, Man-Made**)
recent advances in the uses of (*Swanson*) 755
FIBER-YARN RELATIONSHIPS
punched-card methods for studying (*Wakeham, Steward*) 431
FIBROGRAPHS, manual, improvement on the servo conversion of (*Tallant*)—**L** 815
FIBROGRAPH TESTS
use of dial gauges in calculating the results of (*Rouse*) 505
FIBROUS MATERIALS
activation analysis of (*Tessler, Rutherford*) 86
FILM
load-extension tester, two-dimensional, for (*Checkland, Bull, Bakker*) 399
FINISHING
evaluating antistatic finishes (*Steiger*) 721
FLUOROCHEMICALS
oil and water repellent finishes for cotton using (*Segal, Philips, Loeb, Clayton, Jr.*) 233
FORMALDEHYDE
reaction of with wool and its effect on digestion by insects (*McPhee*) 303
FRICTION, surface
of yarns, a plowing theory of (*Kaliski*) 325
FUMARIC ACID
in raw cotton fiber, identification and isolation of (*Gregory, Merola*)—**L** 813
FUNGICIDES
phenolic, the identification and estimation of in mildewproof materials (*Hillon*) 263

GAMMA RADIATION, *See* **RADIATION**

HALF LAP NEEDLING
effect on cotton combing efficiency (*Sperling*) 600
HYDROCHLORIC ACID
effect on physical properties of nylon (*Larose*) 980

IMPACT RESISTANCE
microscopical studies of a multilayer nylon body armor panel after impact (*Susich, Dogliotti, Wrigley*) 361
INFRARED SPECTROSCOPY
application of to investigations of cotton and modified cottons—physical and crystalline modifications and oxidation (*O'Connor, DuPré, Mitcham*) 382
chemical modifications of cotton, investigation of (*O'Connor, DuPré, McColl*) 542
INSECTS
wool, digestion of by insects—the effect of formaldehyde (*McPhee*) 303
INTEGRATOR-DIFFERENTIATOR, electronic, dynamometric applications of (*Grignet, Monfort*) 47
IODINE SORPTION VALUES
of chemically modified cottons (*Bailey, Honold, Skau*)—**L** 895
IRRADIATION, ULTRAVIOLET
and the wool fiber epicuticle (*Haly*)—**L** 182

JUTE FILAMENTS
change of cross-sectional area with relative humidity (*Chakravarty*) 878

KERATIN (*See also* **Wool**)
fibers, microscopic studies on the structure and composition of (*Menkart, Coe*) 218
fibers, the nature of permanent set in (*Feughleman, Haly, Mitchell*) 655
penetration and supercontraction of by lithium bromide solutions (*Haly, Griffith*) 32
variability of set in (*Mitchell, Feughelman*) 453
pore size of (*Speakman, Harrison*) 1005
reactivity of (*Ghosh, Holker, Speakman*) 112

LIGHT RESISTANCE
of cotton resulting from mercerization (*Goldthwait, Robinson*) 120
LOAD-EXTENSION TESTER, two-dimensional, for fabrics and film (*Checkland, Bull, Bakker*) 399

MECHANICAL BEHAVIOR
and supermolecular structure, relationships between in native and chemically modified cotton cellulose (*Tripp, Orr, Ziifle, Conrad*) 404
MERCERIZATION
effect on cotton's resistance to microorganisms (*Cyrot*)—**L** 1048
improved light and weather resistance of cotton resulting from (*Goldthwait, Robinson*) 120
of yarns made from Pima S-1, Peruvian Pima B-B, and Egyptian Karnak cottons (*Murphy, Goldthwait*) 267
response of cotton fibers to (*Rebenfeld*) 462

MERCERIZING
novel mercerizing technique to establish "true" length of cotton yarn (*Goldthwait, Murphy*) . . . 15
MICRONAIRE
cotton fiber maturity rapidly predicted with variable volume of sample in (*Iyengar, Sundaram*)—**L** . . . 1045
MICRONAIRE READING
close approximation of fiber thickness (*Hertel*) . . . 442
MICROORGANISMS
mercerization, its effect on cotton's resistance to (*Cyrot*)—**L** . . . 1048
MICROSCOPICAL STUDIES of a multilayer nylon body armor panel impact (*Susich, Dogliotti, Wrigley*) . . . 361
on the structure and composition of keratin fibers (*Menkart, Coe*) 218
staining technique utilizes two-dye solution (*Smith*)—**L** . . . 1049
MILDEWPROOF MATERIALS
identification and estimation of phenolic fungicides in (*Hilton*) . 263
MINIMUM CARE GARMENTS
a wear study of
laboratory evaluation (*Morris, Wilsey*) . . . 887
subjective evaluation (*Morris, Wilsey*) . . . 881
MOLECULAR WEIGHT
of two seed hair celluloses (*Timell*) . . . 270
MOMENTS OF DISTRIBUTIONS
and their interrelation (*Whitwell, Wakelin*) . . . 929
MYROTHECIUM
on field cotton (*Heyn*)—**L** . . . 444

NEPOTOMETER
factors influencing test results (*Markezich, Tallant, Worner*) . 570
laboratory evaluation of nep potential (*Souther*) . . . 582
method for measuring neps produced by ginning treatments (*Shepherd*) . . . 579
use as a mill instrument—a progress report (*Pryor, Elting*) . . 575
NUCLEAR RADIATION
of cellulose fibers
relative order of stability of (*Tessler, Kiser, Campbell, Rutherford*) 456
NYLON
body armor panel, multilayer, microscopical studies of after impact (*Susich, Dogliotti, Wrigley*) . . . 361
sorption of HCl; effect on (*Larose*) . . . 980
NYLON FABRICS
surface resistivity of at different temperatures and humidities (*Walker*)—**L** . . . 1047
NYLON YARN
response to environmental changes and an equation of stage for (*Eckstein, Olson, Ames*) . . . 701
NYLON 66
rate of creep failure for, effect of temperature on (*Coleman, Knox, McDevit*) . . . 393
Correction . . . 891
tire cords at elevated temperatures, the physical properties of (*Charles, Tarzi*) . . . 797

OIL AND WATER REPELLENT TREATMENTS
for cotton with fluorochemicals (*Segal, Philips, Loeb, Clayton, Jr.*) 233

PERMANENT SET
in keratin fibers, the nature of (*Feughleman, Haly, Mitchell*) . . . 655
PHOTOTENDERIZATION
of cotton duck before and after weathering by anthraquinone 2,6-disulfonic acid (*Baskin, Kaplan*) . . . 554
PHYSICAL PROPERTIES
of nylon
effect of HCl on (*Larose*) . . . 980
POISSON'S RATIO
of fibers, a method for measuring (*Frank, Ruoff*) . . . 213
POLAROGRAPHIC ESTIMATION of the sulfhydryl and disulfide groups in wool (*Human*) . . . 647
POLYSULFONES
fiber forming, synthesis and structure of (*Noether*) . . . 533
PRESERVATIVE TREATMENTS
reliability of soil test methods for evaluating (*Ashcroft*) . . . 422
PUNCHED-CARD METHODS
for studying fiber-yarn relationships (*Wakeham, Steward*) . . . 431

RADIATION, GAMMA
effects of on cotton
properties of purified cotton irradiated in oxygen and nitrogen atmospheres (*Blouin, Arthur*) . . . 198
proposed mechanism of the effect of high energy gamma radiation on some of the molecular properties of purified cotton (*Arthur*) 204
RADIATION, NUCLEAR
dyeing characteristics of irradiated cottons and rayons (*Tessler, Wiehart, Rutherford*) . . . 131
RAYON
the future of (*Wharton, Lund*) . . . 792
irradiated, dyeing characteristics of (*Tessler, Wiehart, Rutherford*) 131
tire cords at elevated temperatures, the physical properties of (*Charles, Tarzi*) . . . 797
RAYON, VISCOSE
non-apparel uses of (*Howsmon*) . . . 805
saturation regain of, deduced from density and swelling data (*Staples*) . . . 950
REACTIVITY
of cellulose (*Urquhart*) . . . 159
RESIN FINISHES
the application of to cotton garments using drycleaning plant equipment (*Graham, Loibl, Wiebush*) . . . 252
RESIN TREATMENT
silicone softeners, their effect on resin-treated cottons (*Simpson*) 170
RHOVYL polyvinyl chloride fibers (*Hochstaedter*) . . . 78

ROVING WEIGHT
variations in produced by the slubber (*Enrick, Hicks*) . . . 564

SATURATION REGAIN
of viscose rayon, deduced from density and swelling data (*Staples*) 950
SILICONE SOFTENERS
their effect on resin-treated cottons (*Simpson*) . . . 170
SLUBBER
variations in roving weight produced by (*Enrick, Hicks*) . . . 564
SOFTENERS
silicone, the effect on resin-treated cottons (*Simpson*) . . . 170
SOIL BURIAL METHOD
reliability of for evaluating textile preservative treatments (*Ashcroft*) . . . 422
SOIL, DRY
distribution of on the surface of cotton fibers (*Tripp, Moore, Porter, Rollins*) . . . 447
SOILING STUDIES
electrical forces affecting soil and substrate in the detergency process—zeta potential (*Harris*) . . . 912
SPINNING
reaction, of fibers (*Pohl*) . . . 473
SPINNING PROPERTIES
of man-made fibers, the evaluation of (*Röder*) . . . 819
SPINNING TESTS
for predicting yarn and fabric quality (*Brasseur*) . . . 626
small lot, predicting ends down from (*Woo*) . . . 612
SPOT TESTS
application of in the examination of synthetic fibers (*Feigl, Gentil, Jungreis*) . . . 892
STAINING TECHNIQUE utilizes two-dye solution (*Smith*)—**L** . . . 1049
STANDARD DEVIATION and coefficient of variation, a rapid approximation for (*Burkhalter*) . . . 91
STATIC ELECTRIFICATION
of fiaments, relation of charge to frictional work in (*Levy, Wakelin, Kauzmann, Dillon*) . . . 897
studies in (*Montgomery, Cunningham*) . . . 971
STATISTICAL STUDIES
moments of distributions and their interrelation (*Whitwell, Wakelin*) . . . 929
punched-card methods for studying fiber-yarn relationships (*Wakeham, Steward*) . . . 431
standard deviation and coefficient of variation, a rapid approximation for (*Burkhalter*) . . . 91
STRESS-STRAIN RELATIONSHIPS
wave propagation in long yarns impacted transversely (*Smith, McCrackin, Schiefer*) . . . 288
SULFUR CONTENT of wool, a method for determining (*Glynn*) . . . 744
SURFACE RESISTIVITY
of cotton, wool, and nylon fabrics at different temperatures and relative humidities (*Walker*)—**L** . . . 1047
SUPERCONTRACTION
and penetration of keratin fibers by lithium bromide solutions (*Haly, Griffith*) . . . 32
SUPERMOLECULAR STRUCTURE
and mechanical behavior, relationships between in native and chemically modified cotton cellulose (*Tripp, Orr, Zisfle, Conrad*) 404
SYMBOLS
use of to illustrate basic actions in fiber processing (*Schwarz*) . . . 560
SYNTHETIC FIBERS
polysulfone fibers, evaluation of (*Noether*) . . . 533
Rhovyl polyvinyl chloride fibers (*Hochstaedter*) . . . 78

TEARING STRENGTH
comparison of three methods for the determination of (*Turl*) . . 839
TENSILE STRENGTH
of fibers, single, a tester for (*Crane, Wharff*) . . . 343
of yarns, a comparison using different gauge lengths and rates of loading (*Mereness*) . . . 351
TENSILE STRENGTH TESTER for single fibers (*Crane, Wharff*) . 343
TENSILE TESTING
of fibers, high speed (*Ballou, Roetling*) . . . 631
TESTING EQUIPMENT
See also—names of individual machines and types of apparatus
comparison of tensile strengths of yarns using different gauge lengths and rates of loading (*Mereness*) . . . 351
Fibrographs, manual
improvement on the servo conversion of (*Tallant*)—**L** . . . 815
Fibrograph tests, use of dial gauges in calculating the results of (*Rouse*) . . . 505
load-extension tester, two-dimensional, for fabrics and film (*Checkland, Bull, Bakker*) . . . 399
single fiber tensile strength tester (*Crane, Wharff*) . . . 343
yarn irregularity tester using the vibrating string principle (*Downes, Leary*) . . . 497
TESTING PROCEDURES
alkaline thioglycollate extraction test for wool (*Lennox*) . . . 949
microscopical study of a multilayer body armor panel after impact (*Susich, Dogliotti, Wrigley*) . . . 361
soil burial method, reliability of for evaluating textile preservative treatments (*Ashcroft*) . . . 422
tearing strength, a comparison of three methods for the determination of (*Turl*) . . . 839
Verel fiber, identification and determination of in fabrics (*Coover, Lyon, Wooten*)—**L** . . . 530
TEX
tex–cotton count conversion scale (*Louis*)—**L** . . . 716
universal yarn numbering system (*Scroggie*) . . . 330
THIOGLYCOLLATE (alkaline) extraction test for wool (*Lennox*) 949
THIOGLYCOLLIC ACID
the fate of in wool durably creased with thioglycollate (*Springell*) 874

TIRE CORDS
of rayon and nylon 66, their behavior at elevated temperatures (*Charles, Tarzi*) . . . 797
TOPOCHEMICAL MECHANISMS
involved in the preparation and deacetylation of partially acetylated cottons (*Bailey, Honold, Skau*) . . . 861
TORQUE development in singles yarn (*Platt, Klein, Hamburger*) . . 1
TOWELS, absorbency of—effect of home laundering (*Murphy, Macormac*) . . . 337
TWIST
effect of on softness of 31/2 cotton yarns (*Skau, Honold, Boudreau*) 206

ULTRAVIOLET ABSORBERS (*Coleman, Peacock*) . . . 784
ULTRAVIOLET IRRADIATION
and the wool fiber epicuticle (*Haly*)—**L** . . . 182
UREA-BISULFITE SOLUBILITY and disulfide exchange in wool, relation between (*Kessler, Zahn*)—**L** . . . 357
USTER EVENNESS CALCULATIONS
slide rule for correcting (*Mullen*) . . . 272

VEREL
fiber, identification and determination of in fabrics (*Coover, Lyon, Wooten*)—**L** . . . 530
VIBROSCOPE
automatic (*Mackay, Downes*) . . . 467
findings and recommendations for the use of (*Pall*) . . . 691
modified Vibroscope technique (*Bush*) . . . 89
self-resonating (*Parker*)—**L** . . . 531
VISCOSITIES
comparison of methods for determining intrinsic viscosities from non-Newtonian viscosities (*Cram, Whitwell*) . . . 849

WEATHERING
of cotton duck treated with anthraquinone 2,6-disulfonic acid (*Baskin, Kaplan*) . . . 554
prior to harvest, influence on certain properties of cotton fibers (*Marsh, Merola, Butler, Simpson*) . . . 95
WEATHER RESISTANCE
of cotton resulting from mercerization (*Goldthwait, Robinson*) . . . 120
WOOL
alkaline thioglycollate extraction test for (*Lennox*) . . . 949
amide cross-links, attempts to introduce into wool (*Maclaren*) . 946
amino acid composition of fractionated cortical cells from (*Simmonds, Bartulovich*) . . . 378
bilateral structure and the swelling of mild pretreated wools (*Satlow, Kessler*)—**L** . . . 359
bleaching, evaluation of formaldehyde pretreatment for (*Moore, O'Connell*) . . . 687
felting, cause of (*Dobosy*)—**L** . . . 717
Burmese, cortical differences in (*Lang*) . . . 90
chemical composition of
comparison of Merino wools of differing crimp with that of other animal fibers (*Simmonds*) . . . 314
cortical cells from, amino acid composition of (*Simmonds, Bartulovich*) . . . 378
cortical components, estimation of in various wools (*Thorson*) . 185
crimp
and cross-sectional area, effect of on mechanical properties of wool fibers (*Dusenbury, Wakelin*) . . . 989
the significance of in the woolen system (*Menkart, Joseph*) . . . 940
cross-sectional area and crimp, effect on mechanical properties of fibers (*Dusenbury, Wakelin*) . . . 989
dyeing
fiber damage in the stock dyeing of (*Gullbrandson*) . . . 965
effect of water content on the action of sulfuric acid on; the significance of tests for damage (*Crewther, Pressley*) . . . 73
fabrics
the fate of thioglycollic acid in wool durably creased with thioglycollate (*Springell*) . . . 874
structural compactness of woven fabrics and their behavior in modern washing machines (*Bogaty, Lourigan, Harris*) . . . 733
surface resistivity of at different temperatures and humidities (*Walker*)—**L** . . . 1047
fiber diameter, some historical evidence relative to the assessment of (*Bryant*) . . . 88
fiber epicuticle and ultraviolet irradiation (*Haly*)—**L** . . . 182
fibers in tops
dynamometric measurements of the mean value of specific strength, work of stretching, and rate of loading (*Grignet, Monfort*)—**L** . . . 719
formaldehyde—its reaction with wool and its effect on digestion by insects (*McPhee*) . . . 303
maximum alkali-combining capacity of (*McPhee*)—**L** . . . 714
Merino—comparison of chemical composition of wools of differing crimp with that of other animal fibers (*Simmonds*) . . . 314
mothproofing of with Dieldrin (*Lipson, McPhee*) . . . 679
penetration and supercontraction of keratin fibers by lithium bromide solutions (*Haly, Griffith*) . . . 32
relation between urea-bisulfite solubility and disulfide exchange in (*Kessler, Zahn*)—**L** . . . 357
sulfhydryl and disulfide groups in, the polarographic estimation of (*Human*) . . . 647
sulfur content of, a method for determining (*Glynn*) . . . 744
surface active agents added to wool; industrial carbonizing trials to assess the protection of wool (*Crewther, Pressley*) . . . 67
WRINKLE RESISTANCE
durable creasing of wrinkle resistant cotton (*Reid, Reinhardt, Kullman*) . . . 242

YARN
cotton, practical aspects of fibrous acetylation of (*Bryant*) . . . 180
irregularity tester using the vibrating string principle (*Downes, Leary*) . . . 497
quality and processing performance, the effect of bottom front roll run-out in spinning on (*Bragg*) . . . 530
softness, a method for measuring, and its use to show the effect of single and ply twist on the softness of 31/2 cotton yarns (*Skau, Honold, Boudreau*) . . . 206
surface friction, a plowing theory of (*Kaliski*) . . . 325
tensile strength of, a comparison using different gauge lengths and rates of loading (*Mereness*) . . . 351
tex universal numbering system (*Scroggie*) . . . 330
torque development in singles (*Platt, Klein, Hamburger*) . . . 1

ZETA POTENTIAL
electrical forces affecting soil and substrate in the detergency process (*Harris*) . . . 912

BOOK REVIEWS

Advances in Carbohydrate Chemistry, Vol. XI. M. L. Wolfrom, ed. (1956) . . . 274
Biological Treatment of Sewage and Industrial Wastes, Vol. I. Brother Joseph McCabe and W. W. Eckenfelder, Jr., ed. (1956) . . . 93
The Carbohydrates, Chemistry, Biochemistry, Physiology. Ward Pigman, ed. (1957) . . . 1052
Cellulose and Cellulose Derivatives, Vol. V. 2nd ed., rev. Emil Ott, Harold M. Spurlin, and Mildred W. Grafflin, ed. (1954–55) 273
The Chemistry and Technology of Leather, 1956. Vol. I. F. O'Flaherty, W. T. Roddy, and R. T. Lollar, ed. (1956) . . 532
Emulsions: Theory and Practice. Paul Becker (1957) . . . 970
The Encyclopedia of Chemistry. George L. Clark and Gessner G. Hawley, ed. (1957) . . . 93
Fiber Microscopy. A. N. J. Heyn (1954) . . . 273
Handbook of Chemical Data. F. W. Atack, ed. (1957) . . . 446
Man-Made Fibres. R. W. Moncrieff (1957) . . . 969
The Mathematics of Diffusion. J. Crank (1956) . . . 94
Natural and Synthetic Fibers Handbook, 1956. Milton Harris and H. Mark, ed. (1957) . . . 532
The Physics of High Polymers, Vol. IV. H. A. Stuart, ed. (1956) 1051
Research is People (1956) . . . 969
Rheology: Theory and Application, Vol. I. F. R. Eirich, ed. (1956) . . . 817
Statistical Methods in Research and Production. 3rd ed. Owen L. Davies (1957) . . . 93
Surface Active Agents and Detergents, Vol II. A. M. Schwartz, J. W. Perry, and J. Berch (1958) . . . 446
The Technology of Cordage Fibers and Rope. David Himmelfarb (1957) . . . 816
Textile Chemicals and Auxiliaries. Henry C. Speel and E. W. K. Schwarz (1957). . . . 969
Transactions of the Society of Rheology, Vol I. (1957) . . . 274
